

Mobile Connector™

Wireless Bluetooth audio integration

Capture lessons and stream audio from your smartphone to the whole classroom.

Mobile Connector can be added to any classroom audio system to enable wireless Bluetooth streaming from a teacher's mobile device or laptop to be played through the classroom speaker. Additionally, it enables audio/video recording from an iOS or Android mobile device for lesson capture with crystal clear audio.

- Bluetooth audio streaming to any classroom audio system
- Mobile device video and audio recording for lesson capture with mobile app (iOS and Android)
- Use as stand-alone Bluetooth microphone for mobile lesson capture

Mobile Connector™ Bluetooth Streaming & Recording

PLAY MUSIC / AUDIO BOOKS FROM LAPTOPS AND DEVICES

With Mobile Connector plugged in to your existing audio amplifier, you can stream music, books, podcasts, etc. through your classroom audio system.

AUDIO & VIDEO LESSON CAPTURE OF TEACHER MICROPHONE

Inegrate Mobile Connector with your existing audio amplifier to record lessons with the mobile app (iOS and Android).

STAND-ALONE BLUETOOTH MICROPHONE RECORDING

Wear Mobile Connector to use as a stand-alone Bluetooth microphone for mobile lesson capture.
